

Igloo

You will need:

- empty dome-shaped food container
- toilet roll tube
- white glue, such as PVA
- scissors
- glue spreader
- plate for glue
- mini marshmallows
- permanent pen
- battery-operated fairy lights (optional)

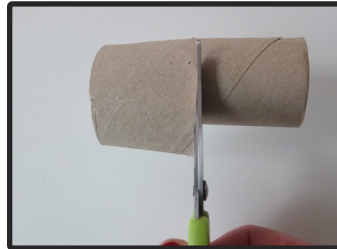

1

First, make sure that your empty food container is clean and ready to use.

2

Carefully, using scissors, cut the toilet roll tube in half lengthwise. Then, carefully cut the toilet roll tube in half widthwise.

3

Put the cut toilet roll up against the container and draw around the semi-circular shape, using a permanent pen.

4

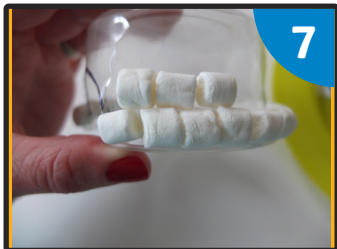

Carefully, using scissors, cut along the curved line on the empty food container.

5 Push the toilet roll tube into the slot in the food container.

6 Now, glue the mini marshmallows on to the food container, using white glue. Start gluing from the bottom and work around in a circle.

7 Once one line of marshmallows has been stuck on, move up to the next line and glue these on in a brick pattern (so the marshmallows are not directly above one another).

Continue until the whole container and the toilet roll tube have been covered in marshmallows.

8 When all the glue is dry, you can put your battery-operated fairy lights underneath the igloo and switch them on. Your igloo is now ready!
